

The diagram illustrates a curved electrode array, labeled 1, which is a semi-circular structure with a grid-like pattern. It is connected to a series of electrode elements, labeled 2 and 3, which are arranged in a row. Each electrode element consists of a rectangular block (11 or 13) and a smaller rectangular block (12 or 12'). The elements are connected to a common ground (14 or 14') via a series of electrical connections (13 or 13'). The diagram shows the electrical connections for each element, including ground symbols (⊖) and power symbols (⊕).
